

GALVANized!

by Matteo Montanari, self published, 2019

10 postcards 10cm x 15cm (print on both sides)

The postcards art is obtained by screen captures of the live video performance for the “Dj Balli + Amphibian - GALVANized!” show held in Macao (Milan - Italy) on October 2019 (watch an extract [here](#)). The footage consist of a bunch of colorful frogs found on the web (amateur videos, creepy youtube cartoons, free 3d models), mixed with stuff about Luigi Galvani and his experiments uploaded by teachers and educators around the globe. Everything has been glitched with a technique which randomly replace bytes with trash, violently shaken at the best speedcore rhythms and screen captured during the live show.

Bio

Matteo Montanari is an artist and multimedia designer based in Bologna (Italy) who works with live video and installations. His research is carried out in the fields of video art, interactive technologies and a passionate collection of materials and inspirations. As “**Taleo**” he performs and exhibits in festivals, clubs, galleries, squats, underground parties and cyberpunk raves. Cofounder of the electronic and experimental festival “[Bologna Elettrica](#)”.
